

Module 1

Section 1.0

Section 1.0: Maritime mobile service

- 1.1 Regulations
 - 1.1.1 Restricted Operator's Certificate (Maritime)
 - 1.1.2 Radio Station Licence
 - 1.1.3 Authorities: ICSM, ITU, CGR
 - 1.1.4 Radio station requirements
 - 1.1.5 Documents
 - 1.1.6 Secrecy of communications
 - 1.1.7 The international distress, safety and calling frequencies
 - 1.1.8 Propagation and use of VHF transmitter power switch
 - 1.1.9 Radio Frequency (RF) Exposure

Section 2.0

Section 2.0: Procedures

- 2.1 Uses of marine radio
 - 2.1.1 False distress
 - 2.1.2 Profane and offensive language
 - 2.1.3 Interference/superfluous transmissions
- 2.2 Radio operation
 - 2.2.1 Speech transmission techniques
 - 2.2.2 Word spelling
 - 2.2.3 Numbers
- 2.3 Procedural words and phrases
- 2.4 Time
 - 2.4.1 Examples of transmission
 - 2.4.2 Transmission of date
- 2.5 Call signs (if required)
- 2.6 Calling
 - 2.6.1 Procedure
 - 2.6.2 Single station call (vessel calling another vessel)
 - 2.6.3 Single station call (vessel calling a Coast Guard radio station)
 - 2.6.4 General call (vessel calling "All Stations")
 - 2.6.5 Multiple station call: (vessel calling more than one vessel)
 - 2.6.6 Replying to calls when information is missing
- 2.7 Choice of frequencies
 - 2.7.1 Channel groups
 - 2.7.2 Channel types and designations
- 2.8 Telephone calling
- 2.9 Radio checks
 - 2.9.1 Readability scale
- 2.10 Control of communications
- 2.11 Priorities

Section 3.0

Section 3.0: Distress communications

- 3.1 Priority
- 3.2 Frequencies to be used
- 3.3 Distress signal
- 3.4 Distress call
- 3.5 Distress message
 - 3.5.1 Example of a distress call and message from a ship
 - 3.5.2 Repetition of a distress message
- 3.6 Action by other ships
 - 3.6.1 Acknowledgement of receipt of a distress message
 - 3.6.2 Relay of a distress message
 - 3.6.3 Further action
- 3.7 Distress traffic
 - 3.7.1 Control of distress traffic
- 3.8 Imposition of silence
 - 3.8.1 Example on a specific station by the vessel in distress
 - 3.8.2 Example of “All Stations” by vessel other than vessel in distress
 - 3.8.3 Example of “All Stations” by a Coast Guard radio station that is the controlling station
- 3.9 Cancellation of distress
 - 3.9.1 Example of cancellation of distress (by rescue vessel)

Section 4.0

Section 4.0: Urgency communications

- 4.1 Priority
- 4.2 Frequencies to be used
- 4.3 Urgency signal
- 4.4 Urgency message
 - 4.4.1 Examples of urgency calls and messages
- 4.5 Cancellation of urgency

Section 5.0

Section 5.0: Safety communications

- 5.1 Priority
- 5.2 Safety signal
- 5.3 Procedures
- 5.4 Example of a safety call

Section 6.0

Section 6.0: Distress simulations

- 6.1 Involvement with Canadian Coast Guard radio stations
- 6.2 Distress call and message
 - 6.2.1 Acknowledgement of mayday by CCG radio
 - 6.2.2 Distress relay
 - 6.2.3 Acknowledgement/assist by other station
 - 6.2.4 Distress traffic
 - 6.2.5 Impose silence by controlling station
 - 6.2.6 Impose silence by vessel other than vessel in distress
 - 6.2.7 Distress traffic on scene
 - 6.2.8 Cancellation of distress by controlling station
- 6.3 Homework study
 - 6.3.1 Distress call and message from a ship
 - 6.3.2 Acknowledgement by another ship
 - 6.3.3 Distress traffic
 - 6.3.4 Imposition of silence
 - 6.3.5 Cancellation of distress
 - 6.3.6 Distress call and message
 - 6.3.7 Relay by another vessel

Section 7.0

Section 7.0: Additional information

- 7.1 Alarm signals
 - 7.1.1 Radiotelephone alarm
 - 7.1.2 Navigational warning signal
 - 7.1.3 Emergency Position Indicating Radio Beacon (EPIRB)
 - 7.1.4 Emergency Position Indicating Buoy (EPIB)
- 7.2 General electronic information
 - 7.2.1 Lead acid storage batteries
 - 7.2.2 Wiring
- 7.3 Alternative radio services
 - 7.3.1 General Radio Service (GRS)
 - 7.3.2 Amateur radio service (HAM RADIO)
 - 7.3.3 Family radio service
 - 7.3.4 General Mobile Radio Service (GMRS)

Module 2

Global Maritime Distress and Safety System Introduction

SECTION 1.0

Section 1.0: Traditional system

- 1.1 Regulations
 - 1.1.1 General
 - 1.1.2 Restricted Operator's Certificate
 - 1.1.3 Radio station licence
 - 1.1.4 Radio log
 - 1.1.5 Secrecy
 - 1.1.6 Additional
- 1.2 Procedures
 - 1.2.1 Uses
 - 1.2.2 Operation
 - 1.2.3 Phonetics
 - 1.2.4 Words and phrases
 - 1.2.5 Time
 - 1.2.6 Call signs
 - 1.2.7 Calling
 - 1.2.8 Simplex
 - 1.2.9 Duplex
 - 1.2.10 Radio checks
 - 1.2.11 Channels
 - 1.2.12 Priorities
 - 1.2.13 Other
- 1.3 Shortcomings
 - 1.3.1 Coverage
 - 1.3.2 Watchkeeping
 - 1.3.3 Position

SECTION 2.0

Section 2.0: Global Maritime Distress and Safety System (GMDSS)

- 2.1 System overview
 - 2.1.1 Carriage requirements
 - 2.1.2 Distress frequency monitoring
- 2.2 GMDSS basic concept

SECTION 3.0

Section 3.0: GMDSS regulations and application

- 3.1 Equipment requirements
 - 3.1.1 International voyages
 - 3.1.2 Domestic non-pleasure craft
 - 3.1.3 Pleasure craft
 - 3.1.4 Coastal stations
 - 3.1.5 Great Lakes
- 3.2 Sea areas
 - 3.2.1 Sea Area A1
 - 3.2.2 Sea Area A2
 - 3.2.3 Sea Area A3
 - 3.2.4 Sea Area A4
 - 3.2.5 Operations
 - 3.2.6 Equipment requirements
- 3.3 Maritime Mobile Service Identity (MMSI)
 - 3.3.1 Vessel identification
 - 3.3.2 DSC MMSI prerequisite
 - 3.3.3 Industry Canada
 - 3.3.4 Routine calls
 - 3.3.5 Ease of communication

SECTION 4.0

Section 4.0: Digital Selective Calling (DSC) radios

- 4.1 GMDSS primary component
 - 4.1.1 Range limitation
 - 4.1.2 Large non-pleasure craft
 - 4.1.3 Smaller non-pleasure craft
 - 4.1.4 DSC radio standards
 - 4.1.5 DSC radio selection
 - 4.1.6 Channel 70 use
 - 4.1.7 Routine calling
 - 4.1.8 Position information
 - 4.1.9 Alert
 - 4.1.10 DSC radio identification
- 4.2 Classes of DSC radios
 - 4.2.1 Class A
 - 4.2.2 Class B
 - 4.2.3 Class C
 - 4.2.4 Class D
 - 4.2.5 SC-101
- 4.3 DSC functions
 - 4.3.1 DSC features
 - 4.3.2 DSC functions
 - 4.3.3 Watchkeeping

- 4.3.4 Capabilities
- 4.3.5 Initial contact
- 4.3.6 Summary
- 4.3.7 U.S. Coast Guard infrastructure
- 4.4 DSC procedures
 - 4.4.1 Operational procedures
 - 4.4.2 DSC optimization
 - 4.4.3 Distress procedure
 - 4.4.4 Distress response
 - 4.4.5 Urgency procedure
 - 4.4.6 Safety procedure
 - 4.4.7 Routine call procedure
 - 4.4.8 Repeating a routine call

SECTION 5.0

Section 5.0: Emergency Position Indicating Radio Beacons (EPIRBs)

- 5.1 EPIRBs
 - 5.1.1 Category 1 EPIRB
 - 5.1.2 Category 2 EPIRB
 - 5.1.3 Locating
 - 5.1.4 Accuracy
 - 5.1.5 Tests
 - 5.1.6 Registration
 - 5.1.7 EPIRB identity
- 5.2 COSPAS-SARSAT satellite system
 - 5.2.1 Orbit
 - 5.2.2 Response time
 - 5.2.3 Coverage
 - 5.2.4 Registration

SECTION 6.0

Section 6.0: Other GMDSS equipment

- 6.1 MF DSC radios
 - 6.1.1 Requirement
 - 6.1.2 Digital calling
 - 6.1.3 Voice calling
- 6.2 Portable VHF radios
 - 6.2.1 Requirements
 - 6.2.2 Uses
 - 6.2.3 Limitations
- 6.3 NAVTEX receivers
 - 6.3.1 Purpose
 - 6.3.2 Service
 - 6.3.3 Data
 - 6.3.4 Areas

- 6.3.5 Frequency
- 6.4 Search and Rescue Transponders (SARTs)
 - 6.4.1 Purpose
 - 6.4.2 Locating
 - 6.4.3 Response
 - 6.4.4 Accuracy
 - 6.4.5 Usefulness

SECTION 7.0

Section 7.0: DSC practical exercises

- 7.1 Distress call
- 7.2 Urgency call (all ships)
- 7.3 Safety call (all ships)
- 7.4 Routine call (to another vessel)
- 7.5 Acknowledging calls (distress, all ships, routine)
 - 7.5.1 Distress
 - 7.5.2 All ships
 - 7.5.3 Routine

Appendices

- Appendix 1** Table of Transmitting Frequencies
- Appendix 2** Marine VHF Channel Groups—Canada, USA & International
- Appendix 3** Federal Statutes and Contraventions Act
- Appendix 4** Time zone comparison
- Appendix 5** Radio station licence sample (if required)/Exemptions
- Appendix 6** Safety information
- Appendix 7** Regional and District offices of Industry Canada—Spectrum Management
- Appendix 8** United States Homeland Security Information

Glossary

Note: Penalties quoted in this manual are mandated by the Radiocommunications Act and Regulations.

See Appendix 3—Contraventions Act.
